

You've got a lot on your plate as a small business owner, and there simply aren't enough hours in the day to get everything done without a helping hand. That's why we've created KashFlow Accounting Software.

KashFlow is bookkeeping and accounting software that covers everything from sending out invoices to preparing your tax returns, and cuts out all the confusing jargon or complicated processes along the way.

Simply enter your figures, run your reports and share your books with your accountant (via our handy Additional Users feature) – all with just a few clicks. As KashFlow is cloud-based software, everything will be securely saved and updated in real time.

Small businesses need to stay agile to survive, so KashFlow offers a comprehensive range of features to support your evolving business. Create professional branded invoices in-app, and get paid faster with a range of payment options including Square, GoCardless and Global Payments.

If you're VAT-registered (or thinking about it) then you'll be pleased to know our software is ready for Making Tax Digital, so there's no extra work to worry about once the April 2019 deadline arrives. Visit our **Making Tax Digital Hub** to learn more [www.ukdigitaltax.com](http://www.ukdigitaltax.com).

*KashFlow is focused on what a small business needs and it is really easy to use. The people are passionate and helpful, and it keeps getting better.*

Tom Stewart, Carrarini Wellness Ltd

*KashFlow has helped my business by giving me time back. The interface is so easy to use and I can enter information anywhere so it means that I'm no longer spending hours updating records at the end of the day.*

Christopher Davis, Right Track Training

*KashFlow is user-friendly software which makes keeping accounts easy for untrained financial managers. The software enables me to examine the status of my company accounts in several different ways. I have recommended it to others and will continue to do so.*
